Subject: FW: Malathion - FMC-Cheminova comments on draft biological evaluation.....
Attachments: Comments on USEPA Draft OP BEs_FESTF.pdf

Tracy,

I'm not sure I included this in the original email to you but this may also be helpful, though I'm not sure this is the use information they were referring to.

Thanks Steven

Here is one more from the Federal Endangered Species Task Force (FESTF). We are a member.

I know IR-4 and AMCA also submitted comments. I believe there are also comments from various mosquito control districts and ag/crop associations.

Best regards,

Paul

Subject: Malathion - FMC-Cheminova comments on draft biological evaluation.....

Hi Steven

Attached are courtesy copies of the documents that we submitted to EPA's docket on the draft biological evaluation of malathion. I will also be submitting these documents to EPA's front end processing desk to receive MRIDs. As noted in the attached cover letter, there are a few additional study reports that will also be submitting to the front end-processing desk.

I've also attached comments from CropLife America as those were also submitted to the docket for malathion.

If you have any questions, or would like to discuss any of our comments, please feel free to contact me.

Best regards,

Paul Whatling
